

## **Craft: “Turn around Time Machine”**

Purchase, or obtain from a retailer, large size cardboard boxes. The boxes should be large enough for a class member stand inside of it. Provide blue, washable craft paint and 1” brushes, packaging tape and glue. Using the print sheets provided for this craft, print decals to be glued onto the boxes.

Give each member a box and have them open the flaps and tape the flaps together so the case is in an open position. Cut holes in two opposite top flaps to serve as arm holes. (Leave ample corrugate above the holes to avoid tearing.) The design of the box is to appear like an old British phone booth (like “Dr. Who” television series). Cut out the decals and glue onto the case to make the phone booth design. Use paint to make outline of phone booth door and knob. Windows may be drawn if time permits.
